Panels

Zenturo is a universal "all-in-one" solution for limitless contemporary fencing and garden decoration concepts. Be the co-designer of your fence!

Zenturo®

BENEFITS

Versatility

The Zenturo panel can be used as a fencing panel, for the creation of privacy, as a climbing plant support or as a decorative garden gabion wall. More over, unique compatible Zenturo infills are available to give a creative, personal touch to the fence.

Innovative design

The flat garden panel is very attractive, thanks to its combination of different mesh sizes and double, alternating horizontal wires.

The panel is available in standard green, as well as in a fashionable metallic anthracite colour. Other colours are available on demand. The different Zenturo panel infills offer a multitude of attractive configurations!

Easy installation

The Zenturo panels can be installed with the standard available post systems for residential panels: posts Bekaclip (with Bekafor accessories) and posts Bekafor Click (without accessories).
Specific tools or experierience in installation are not required!

Quality

The panels are welded out of galvanised wires. Subsequently, they are polyester coated with high adhesion, which guarantees quality and lifetime.

Applications

Residential surroundings:
• Used as fencing panels
• Creation of privacy
• Climbing plant support
• Decorative garden gabion wall

Panels

The Zenturo panel is a flat panel, with a combination of 3 different mesh sizes : 100 x 100, 100 x 50 and 50 x 50 mm. The double, alternating horizontal wires offer good rigidity.

The panels have a width of 2005 mm and are available in a range of heights from 655 till 2005 mm. Wire diameter of the horizontal wires: 5.00 mm, wire diameter of the vertical wires: 4.15 mm.

Post and fixing systems

Bekaclip post system (p 93)

Zenturo panels can be installed with metal posts type Bekaclip (as used for Bekafor Classic & Prestige panels). The panels can easily be fixed to the posts using standard Bekafor accessories.

Bekafor Click post system (p 94)

The Zenturo panels are as well compatible with the Bekafor Click post system.This unique post concept has pre-installed clips for fixation of the panels to the posts. Consequently, accessories or tools for standard installation are not required.

Gates

The Zenturo panel fence matches perfectly with the Bekafor Classic & Bekafor Garden gate ranges.

Coating technique

Panels are made out of galvanised wires. An adhesion coating is given for a perfect adhesion of the polyester coating (min. 100 micron).

Colours (p 116)

Green RAL 6005 and Metallic Anthracite BF7016M.
Other colours on request.

Infills

The Zenturo panel can be filled with 3 different, unique & decorative 'infills':

Pixels

These square and rectangular plastic elements perfectly fit into the panel's different mesh sizes: 100x100, 100x50 and 50x50 mm. The pixels can be easily clicked on the panel and can be used to form numbers, words or patterns on the fence... Available in green and metallic anthracite.
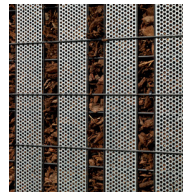

Flexo Strip

The Zenturo panels can as well be filled with the Flexo Strip. The flexible plastic strip is available in 2 widths (for mesh width 50 and 100 mm) and can be woven through the panel's meshes, both in vertical and horizontal direction. Available on rolls of 50 m (to be cut to length), in green and anthracite.

Perfo Strip

The Zenturo Perfo strip is a perforated stainless steel strip, available in lengths of 170 and 200 cm and 2 widths (for mesh width 50 and 100 mm). The strip can be put vertically in the panel.

The infills can be used:
- to give a unique design to the fence
- to create your own required level of privacy
  (panels can be fully or semi-filled)
- to blind the panel's biggest meshes when used in a gabion construction
